

# ENGINEERING OPPORTUNITIES

## Job Description:

Andersen Corporation currently has multiple engineering opportunities in the following functional areas:

**MANUFACTURING/OPERATIONS** - Primary responsibilities in Manufacturing/Operations are to drive department and enterprise key initiatives within the Value Streams through the utilization of continuous process improvement; improve customer satisfaction; reduce waste; increase efficiency and eliminate variation with manufacturing processes.

**RESEARCH, DEVELOPMENT & INNOVATION** - Primary responsibilities in RD&I are to deliver new manufacturing systems and develop process/material platforms from concept to operational transition. Roles collaborate with operational partners to identify product improvement opportunities and align solutions to operational requirements.

**QUALITY** - Primary responsibilities in Quality are to drive quality initiatives and projects across Andersen's manufacturing facilities and to manage quality issues and quality system improvements.

Engineering disciplines sought include:

- Chemical
- Electrical
- Industrial
- Mechanical
- Manufacturing Technology

Opportunities are available in:

- Bayport, MN
- Cottage Grove, MN
- North Branch, MN
- Menomonie, WI

## Job Requirements:

### **MANUFACTURING/OPERATIONS:**

- Four year Engineering or Technology degree
- Experience level varies by position
- Equipment procurement experience
- Strong project management skills
- Strong Lean manufacturing principles
- Strong knowledge of quality systems, SPC and process capability

### **RESEARCH, DEVELOPMENT & INNOVATION:**

- Four year Engineering or Technology degree (chemical and mechanical preferred)
- Experience level varies by position
- Broad operations knowledge and experience
- Strong project management skills
- Strong Lean manufacturing principles
- Demonstrated ability to work well with diverse groups and extract improvement ideas by facilitating and partnering with cross-functional teams

### **QUALITY:**

- Four year Engineering, Technology or Management degree or equivalent training and experience
- Experience level varies by position
- Knowledge of quality programs and initiatives, SPC, and process capability work
- Collaborative leadership style with the ability to influence key stakeholders
