

Are you a hands-on Quality Engineer who thrives on using their critical thinking and problem solving skills to make medical device products the best products they can be? Do you want to be part of a Quality Engineering team that is involved with New Product Development working with exciting advanced technology?

Starkey Hearing Technologies, an equal opportunity employer, and a recognized world leader in providing the highest quality hearing technology available, has an exciting opportunity for a Quality Engineer at our Corporate headquarters in Eden Prairie, MN.

This position is responsible for verifying, maintaining, and improving the quality of components, subassemblies, and products used and produced by Starkey. Specifically, you will partner with Design Engineering on new product development and participate in design reviews, establish quality requirements, and coordinate qualification testing. You will also assess and drive quality improvement efforts with suppliers.
