

Quality Engineer

rms Company is a dynamic, world class manufacturing organization for the medical industry. Currently, we are looking for an experienced Quality Engineer to join our team.

The successful candidate will have a strong background in quality systems, product inspection, measurement, gaging techniques, excellent interpersonal skills, and the ability to work in a team environment. The Quality Engineer is responsible for the definition, implementation, and improvement of quality-related practices and procedures. This position provides technical guidance and measurement methodologies in addition to assisting in problem solving.

Major Areas of Accountability:

- Develop inspection plans, facilitate PFMEA's, solve discrepant material issues, and implement control plans.
- Perform first article and in-process inspections.
- Support new production during the first build of new products.
- Coordinate, facilitate, conduct, and document problem solving efforts related to product and process quality.
- Analyze data and identify improvement opportunities.
- Lead corrective action activities.
- Responsible for a group of customers on all quality issues.

Qualifications:

- Minimum 8-10 years as a Quality Engineer in a production support role, preferably in a machining environment
- ASQ Certified Quality Engineer
- ISO Certification of manufacturing process
- Knowledge of ISO 13485, FDA, and validation principles
- Able to work/communicate with customers, CNC Machinists, and Engineers
- Must be able to determine root cause and implement corrective actions
- Must be able to read blue prints
- Ability to operate inspection equipment such as optical comparator, Micro-Vu, profilometer (surface analyzer), hardness tester, hand gages, and microscopes
- Ability to apply routine inspection methods and set up open inspection measurements on surface plates and comparators
- Experience in DOE, SPC, and GD and T
- Experience with Control Plans and FMEA's
- Minitab or other statistical software experience
- Must understand GMP
- Experience with six sigma and lean manufacturing techniques
- Prefer experience in a medical manufacturing facility within the quality department

Education:

- * Bachelor of Science Degree, Preferably in Mechanical Engineering
